## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5 and 48-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunstan [US 5,714,870].

Regarding claims 48-60, Dunstan discloses an electronic device configured for monitoring power consumed while said device is in a reduced power condition, comprising an electrical energy storage unit powering said device, a processor, a memory, a display device and a power consumption monitor, said power consumption monitor including means for respectively determining when said electronic device enters and exits the reduced-power state, a means for determining a charge capacity of said electrical energy storage unit before and after said electronic device is in the reduced power state, a means for determining a period of time for calculating charge capacity lost by said electrical energy storage unit during the period of time that the electronic device is in the reduced power state [column 9, lines 27-41]. Dunstan discloses the claim invention except for explicitly mentioned that the entering time is stored in the chip. The examiner takes official notice that it is well known to use chips to store data/information in the micro-processing environment such as notebook computer. It would have been obvious to one of ordinary skill in the art at time of the invention was

made to store data in a chip or a memory means in Dunstan to facilitate rapid access to stored data for calculations purpose.

Regarding claims, 1-3 and 5, the method steps are necessitated by the apparatus structure.

### ***Response to Arguments***

Applicant's arguments filed 09/02/05 have been fully considered but they are not persuasive.

The applicant fails to specifically point out how the language of the currently amended claims patentably differentiates themselves from the applied art and thus the rejection is repeated.

Applicant argues that Dunstan fails to disclose reading the time **immediately** prior to exiting the reduced power state, and storing said time. Examiner disagrees: Dunstan disclose a pre-suspended reading of time in step 120 and a post-suspended/exiting reading of time in step 160 mentioned at column 6, line 40+. Since these values are used in calculation involving an interval of time, it is best to be **recorded immediately** at the beginning and at the end of this interval of time to provide the most accuracy duration of the interval of time. It would have been inaccurate to record an end time of an interval of time **prior** to end of the interval of time.

For the foregoing reasons, claims 1-3, 5 and 48-60 continue to be anticipated by Dunstan. Accordingly, the examiner's rejection is upheld.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
